

**Under the cover of the "financial crisis"
and "recession" ravaging our nation...**

**And using the Patriot Act, hidden provisions of
Congressional bailout bills, and dozens of secret
Presidential orders...**

Washington leftists are about to mount a full-frontal assault on your freedom, your assets, and even your life.

Dear Independent Living Subscriber:

Hard Left ideologues have taken over the D.C. asylum -- and they are going to smash what's left of our free society to smithereens..

As the shocking, unsettling facts contained in this Special Subscriber Briefing illustrate, the newly-installed leftist super-majority has new emergency financial crisis and war powers -- combined with an ugly desire to shred anyone who stands in their way.

Right now you need a serious, workable, long-term self-defense plan if you want to avoid being one of the casualties.

Believers in liberty, privacy, and financial independence have very little time left to prepare for a very disturbing, long-term situation -- one that's going to feel as if hammers are raining from the sky.

Let me give you just one example. Senator Jim Inhofe and Congressman Brad Sherman revealed Outgoing Treasury Secretary Hank Paulson shockingly told Members of Congress during recent closed-door Capitol Hill meetings that the financial meltdown underway could become so extreme martial law may have to be imposed on the American people.

This Astonishing High-Level Prediction Got No Traction

I know, I know, it's amazing Paulson's prediction has made so little news. But that's where I come in -- few people pay attention to departing high-level U.S. "muckety-mucks" the way I do. (In 20+ years of watching federal government power plays like a hawk, I've learned that departing insiders often spill the beans on things to come.)

More disturbingly, Obama's Department of Homeland security issued a bulletin to law enforcement nationwide warning them to keep a close eye on "right wing extremists" -- defined as individualists who, for example, exercise their 2nd Amendment rights or dare to voice opposition to the Federal Reserve or Big Government.

Let me tell you this: In all my time ferreting out these threats to our liberty, never have I seen such ominous storm clouds gathering over what's left of our freedoms.

And you need protection -- armor-plated protection -
- now!

You absolutely, positively need the ALL-NEW 2009 edition of my blockbuster Special Report **Secret Battle Strategies for the War on Freedom: An Insider's Guide to Asserting your Liberties in Neo-Socialist America NOW** -- before it gets on official Washington's radar screen.

Bear with me for a moment, and I will show you how to get your own copy of the brand-new 2009 Obama-era edition for FREE!

The Liberals' Secret Plan to Stay in Power for Decades

Never forget the last time Democrats controlled both chambers of Congress they were in the majority for nearly half a century. When you see how they plan to use recently-enacted emergency "war powers" and other tools to solidify their hold on power, you are not going to sleep very well at night.

For these reasons and many others, my comprehensive **War on Freedom** manual for liberty-loving Americans has liberals sneezing bricks. But more about that later.

For now, let me spell out some very concerning developments, and why it is so important that you stay ahead of them.

Troops in the Streets Are the Least of Our Problems

In this unprecedented and extreme situation, it is very important that you are at least three steps ahead of the neo-socialists now in power -- and at minimum two long steps ahead of the general public, who are so clueless and servile it makes me just want to scream.

Forgive my bluntness, but I am so sick to death of politicians tricking and manipulating the public -- and getting away with it time and time and time again.

Millions of stubbornly-guillible Americans (70% of voters) think this new "Team Obama" is going to "fix" the economy. The voting public is so stupefied that radical Congressional leftists like Barney Frank and Henry Waxman (who are co-conspirators in hatching the terrible economic mess we are in) are actually "coming to the rescue" by holding hearings to blame "deregulation."

I don't know what tightens my gullet more. Hoping against hope the dodo-public will catch on, or watching left-wing Congressional vultures swoop in and paint themselves as "reformers" who are going to "fix" the very fiasco they and their ilk created to begin with.

Radical Socialists Coming to Power, WATCH OUT!

Virtually all levers of federal power are totally controlled by George Soros' army of vengeful leftists. These angry liberals are an ugly, vicious lot and have been frustrated by their minority status for years. Now they are in a position to settle scores — and they are in absolutely no mood to take prisoners.

Ominous signs abound. For example: Obama Chief of Staff Rahm Emanuel recently licked his chops before a **Wall Street Journal** forum, braying that the current financial crisis gives the new Administration "*The opportunity to do things you could not do before,*" and then winked to leftists everywhere: "*You never want a serious crisis to go to waste.*"

Another telling harbinger: An active co-conspirator in the U.S. banking system's collapse is Fannie Mae and Freddie Mac booster Rep. Barney Frank -- now Chairman of the powerful House Financial Services Committee.

Amidst the wreckage of the U.S. financial system that he is directly responsible for precipitating, a gleeful Frank recently said "*This is the best since 1932,*" reflecting the left-wing consensus that the current crisis offers the best opportunity in 80 years for a federal takeover of what's left of our free-market capitalist system.

Obama's New Energy Czar Is Former Commissioner For The Socialist International

Then we have the installation of internationalist hard-left political activist, and global warming fanatic, Carol Browner (former head of the EPA) as the Obama Administration's "energy czar." Carol Browner was recently discovered to be a commissioner in the radical left, bash-capitalism Socialist International.

Browner is among the Obama Administration's cabal of leftist, hard-ball "energy utopians" (including the new head of the House Energy Committee, Henry Waxman). Browner and her cohorts have a disturbing track-record of fanatical dedication to micromanaging how we may use energy -- from what kind of cars we may drive, to the design of the washer/dryer sets in your home.

Get to know the phrase "carbon footprint" well. This is the battle-cry of liberal micromanagers who want to impose a Puritanical reign of total control over how you may live your life --- from what you can buy to how you may travel.

The Left Telegraphs Its Intentions: Destroy All Opponents Now

Independent voters who bought into the "Obama-is-a-centrist" myth are whistling past the graveyard! It's already happening: Angry leftists are testing their new powers to "identify, demonize, and destroy" enemies, critics, opponents and even productive people just trying to protect their life savings.

It has not made much news, for example, but Former Vice President Dick Cheney (with whom the wigged-out left are obsessed) just got zinged with a trumped up indictment.

Of course Dick Cheney is a wealthy, well-connected, well-represented Washington insider with many defenders. So in the end, he may be fine. My point is the left isn't afraid of trying to destroy Dick Cheney, much less use a bazooka to kill someone they regard as a fly. (Remember the left's no-holds-barred Jihad of destruction against Joe the Plumber! I'll get back to his story in a moment.)

And aggressive Congressional Committee Chairmen, led by California's Henry Waxman, put the entire Republican establishment on notice they are going to come under full investigation now that the Obama Administration controls the Justice Department.

The vindictive assault against Dick Cheney and other top Republicans aside, what about the *rest of us* who believe in freedom and self-reliance? I say this because we (meaning independent-thinking individualists) could be next.

The War on Freedom is On, Big-Time

So what it boils down to is this: Are you positioned to survive and prosper in an era in which there is no such thing as "innocent bystanders"? If not, then you got this email just in time!

Neo-Socialists Are Coming to Power in America: You Need to Be Ready!

My worst fears have been realized: Permanent and sweeping new powers the government has given itself to peer into and ruin private lives are now about to be handed over to radical leftists with a take-no-prisoners mentality.

Take the case of Joe the Plumber, a struggling Ohio small businessman who dared to ask candidate Obama how he intends to pay for all his big government spending (especially when the country's finances are already in tatters). The radical left went to war against this ordinary citizen because the normally-tightly-controlled Obama spin machine suffered a rare lapse, in which Obama admitted he intends to "spread the wealth."

Ohio state government operatives ransacked all records looking for dirt on Joe the Plumber and "leaked" it to the media, who used it in an attempt to destroy this private citizen -- a man whose only real crime was doing the media's job by daring to challenge Obama with a

man whose only real crime was doing the media's job by daring to challenge Obama with a real question.

This sort of abuse of power will become increasingly common. In fact, under the terms of the USA Patriot Act the federal government (and apparently now state governments, too) no longer need anything resembling due process in order to dig up any and all private records on anyone they choose to destroy.

It's worth pointing out the left's vicious, all-out assault against Joe the Plumber happened even before Barack Hussein Obama got elected (meaning these people were still on their "best" behavior)!

"Mainstream" Democrat Admits He Plans to Steal What's Yours

Another example of rising governmental extremism is a telling quote by leading Democrat Rep. James Moran of Virginia. Shortly before the election, this supposedly "moderate" Democrat candidly told his best supporters at a campaign stop what he and his liberal cohorts really think about property rights:

"In the last several years, we have had the highest corporate profit ever in American history... But it hasn't been shared. And that's the problem. Because we have been guided by a Republican Administration who believes in the simplistic notion that people who have wealth are entitled to keep it. And they have an antipathy toward the means of redistributing wealth. They may be able to sustain that for awhile, but it doesn't work in the long-run..."

Tellingly, no one in the Democrat party has disavowed Moran's call for seizing the wealth of private citizens. Not the media, not any genuine centrists that may still remain in his own party, and certainly not the incoming Obama Administration.

Beware Secretary of State Hillary Clinton's Agenda to Legislate Using Foreign Treaties

And I can hardly believe the media's silence over the truly devious globalist utopian role the United Nations is going to play in shaping U.S. laws on everything from gun ownership, to tax "harmonization," to stopping capital flight, to eroding property rights and extinguishing private domestic energy production -- especially now that Hillary Clinton is being installed as Secretary of State.

This is a crucial section of my brand new 2009 edition of **The War on Freedom**. Remember, one of the big agenda items of the past Clinton Administration was to "harmonize" U.S. banking, gun control, investing, and private property rights with those of the socialist countries of the European Union.

Secretary of State Hillary Clinton's globalist agenda includes an open border with Mexico, a new hemispheric currency (the "Amero"), and the coordinated international prosecution of Americans (or anyone else) who try to move too much of their wealth abroad.

When you see all the groundwork her husband Bill Clinton has done to foist internationalist rules, regulations, and alien values on U.S. businesses, your first instinct may be to flee to another country.

There Isn't a Moment to Waste on Niceties -- Here's Why

The War on Freedom has entered a new phase, and there are only two basic categories America's remaining freedom-loving people fall into: The prepared and the unprepared (or, in my own politically incorrect reckoning: the clueless versus those who are fully-informed and ready for anything).

As one of my old professors at Hillsdale College recently observed, decades of federal meddling and leftist control of public education has left America with an acute shortage of voters who ask hard, critical questions of the political class.

There are quite simply not enough "situationally-aware" people left to hold back the avalanche of totally-failed socialistic schemes now being offered up to the gullible public as "change" and "hope".

Therefore survival, not drawing attention to ourselves, and keeping what belongs to us must become our first priority.

More to the politically-incorrect point, there is no longer a large enough pool of productive, self-reliant people left to fund all the crazy plans to expand our already bankrupt government -- especially enough to create 2.5 million make-work federal jobs as the incoming Obama Administration wants.

So what we must be prepared to cope with is a broke, ambitious, neo-socialist government -- packed with hard-core vengeful leftists who have new powers to "destroy opponents at any cost." For believers in limited government, this rising era of arbitrary bureaucratic decree is going to feel as though the sky is raining hammers!

A Clintonian "Destroy-critics-at-any-cost" Era Looms

Attacking enemies with new war powers. Ripping your privacy apart. Regulating speech. Taking aim at workers' right to a secret ballot. Snooping into your personal business.

The Federal Reserve Board's secret program to save the federal government from its insolvency crisis by wrecking the value of the dollar. New Congressional hearings on how the government plans to nationalize 401(k)s and IRAs. Obama's universal healthcare mandate and the destruction of private medicine. Tax hikes on capital gains and dividends, environmental decrees, racial reparations, and capital controls.

Insulting your neighbors to report you to the IRS. Encouraging frivolous lawsuits.

marginalizing your neighbors to report you to the IRS. Empowering frivolous lawsuits. Seizing wealth through debt, inflation, and other confiscatory tricks. Crushing critics. Stifling dissent. Punishing enemies.

These are the dangers that face us all.

The 2009 **War on Freedom** mega-manual contains my best-of-the-best research. An "all-nuggets," totally comprehensive treasure trove of essential information you absolutely won't find anywhere else. My **War on Freedom** manual tells it the way things really are and, more importantly, *practical* information on what you can do to hedge your bets and defend yourself from the coming onslaught.

You Need This Prudent Insurance Policy Now With Updated Information You Won't Find Anywhere Else

The limited-edition/distribution **Secret Battle Strategies for the War on Freedom** shows you how to quietly reassert your liberties without joining some nutty militia, becoming a member of a fringe radical group, marginalizing yourself to pointless carping, or otherwise dropping out of society.

That's why I set out to create a comprehensive "how-to" briefing book on surviving the Obama Era of Rising Socialism -- i.e. ways to avoid intrusive new government powers without breaking the law or doing anything that would draw official attention.

Are You At Risk? Learn What to Do... And Not to Do

Quite frankly, many well-meaning people who dare to stand up for their liberty without the insider information contained in this thoroughly researched manual are at severe risk of getting themselves identified and targeted as a "trouble-maker," a "person of interest," or even a subversive.

The hard reality is the vast majority of Americans are clueless as to their peril, and will never have the opportunity to learn about the new power structure emerging in this country or how to reclaim their evaporating freedoms.

The information contained in this manual is so explicit about the secret new powers of government that IRS bureaucrats, Treasury Department officials, and U.N. globalists would positively GAG if they read even a chapter (not that it would bother me much).

Secret Battle Strategies for the War on Freedom gives you the complete updated picture of what is going on behind the scenes in Washington to create a high-tech police state capable of monitoring and controlling the citizenship of the United States in ways that would have been almost unimaginable 10 years ago.

Consider just a few of the eyebrow-raising threats meticulously detailed in my comprehensive **War on Freedom** manual:

- ✓ Secretary of State Hillary Clinton's top secret mission: Revive the planned construction of a new, 4 football field-wide International super freeway linking Mexico, the U.S., and Canada.
- ✓ Exposed! The cabal of hard-left fanatics and how they plan to completely remake America into a "green" society. Out the window goes many of the freedoms that all of us have taken for granted.
- ✓ Forbidden knowledge: How much of the legal groundwork has been laid to deprive us of our most basic rights, including those guaranteed by the Constitution -- and what YOU can do to protect yourself.

- ✓ Clintonian land-grabs are coming back! Learn how some local activists have beaten back an unratified U.N. Convention that has allowed the world body to gain control of huge tracts of U.S. territory -- kicking out hunters, snowmobilers, campers, in fact, almost everyone.
- ✓ The shocking truth about the United Nations' designs on America, especially as seen in the Obama/Hillary-backed "Charter for Global Democracy" -- a chilling blueprint for undermining the power of elected state legislatures and local governments in the United States.
- ✓ Bureaucrats are rejoicing at the prospect of neo-socialists coming to power in the United States of America. Here's ALL you need to know about the revised version of "CAPPS II," the new internal passport system being created for the United States. Once in operation, you will have to have permission to travel by bus, train, rental car, or by air.

These Assaults on Liberty Threaten All Our Freedoms

- ✓ How United Nations bureaucrats conspire with federal employees to circumvent state laws protecting gun owners and property owners, and how to fight back.
- ✓ What the liberal media does NOT tell you about illegal aliens, and how they are being deployed to strike at U.S. targets.

- ✓ Avoid asset forfeiture and emergency confiscation edicts by NOT having these items in your home.

What You Don't Know Can Definitely Hurt You

- ✓ ALERT! How private delivery services such as Federal Express and UPS ignore your rights when federal agencies want to inspect your overnight package.
- ✓ Why the growing home schooling movement has emerged as a major threat to government-run education centers (i.e. public schools) and how the feds are likely to try to crush it.

The Media Will Never Reveal These Dangers

- ✓ Exposed: How the U.S. Army War College now labels Bible-believing religious groups as "likely terrorists."
- ✓ Astonishing "insider plays" by European Union bureaucrats to raise U.S. tax rates by global fiat -- and how their liberal allies in the new Congress are salivating to help.
- ✓ The brutal inside skinny on why you should avoid getting a credit card issued by a foreign bank.
- ✓ The establishment-created "Continuity in Government" commission -- a little-noticed blueprint for martial law most members of Congress DON'T even know about.

- ✓ How credit reporting agencies take false information about you so that banks can charge you thousands more dollars in interest... and what you can do to stop it COLD!
- ✓ What you need to know about government surveillance of private telephone calls and recent financial "bailout" legislation that greatly expands IRS sting operations.
- ✓ It drives bureaucrats crazy, but it's still legal to encrypt your emails -- here's how!

Great Dangers Ahead for Liberty-Loving Americans

- ✓ Why you should NEVER store gold bullion in a safe deposit box as an *individual*. Ignore this at your own risk!
- ✓ The very latest on model medical emergency legislation that is being considered by many state legislatures -- giving bureaucrats a blank check to detain you for "quarantine," or confiscate your property at will!
